OBJECTIVE

Pre-final year B.Tech (Artificial Intelligence) student with hands-on experience across full-stack development, applied machine learning, and NLP research. Seeking a Software Engineering internship to build production-grade systems, deepen core CS fundamentals, and contribute to a fast-paced engineering team.

EDUCATION

B.Tech in Artificial Intelligence

2024 - 2028

Sardar Vallabhbhai National Institute of Technology, Surat — CGPA: 9.25 / 10 (Pre-Final Year)

Higher Secondary — Gujarat Board, Ashadeep Vidhyalaya

2024

Percentage: 95%

Secondary — Gujarat Board, Ashadeep Vidhyalaya

2022

Percentage: 97.3% — All Gujarat Rank 5, SSC Board Examination

TECHNICAL SKILLS

- Languages: C++, Python, JavaScript
- Web Technologies: MERN Stack, Django, FastAPI, Responsive Web UI Design
- Machine Learning & NLP: Model Development & Evaluation, Transformers, Scikit-learn, Feature Engineering
- Core CS: Data Structures & Algorithms, Object-Oriented Programming, API Design & Integration

RESEARCH EXPERIENCE

SemEval-2025 Task 13 — Machine-Generated Code Detection

Tech Stack: Python, NLP, Transformers, Scikit-learn, Pandas, NumPy

- Researched and built transformer-based models to distinguish human- from machine-generated code across mixed text/code datasets.
- Designed preprocessing and feature-engineering pipelines to handle noisy, heterogeneous text/code inputs.
- Co-authored a research paper documenting methodology, experiments, and results for the shared task.

PROJECTS

Joy Juncture — Google Winter of Code (GWOC)

Tech Stack: MERN Stack, Google Cloud, Firebase Auth, Stripe API

- Built a full-stack platform connecting digital engagement with real-world event planning, from database schema to UI.
- Designed gamified engagement modules (Joy Points, Joy Wallet) to drive user retention and rewards.
- Implemented secure authentication, RESTful CRUD APIs, and end-to-end payment gateway integration.

Cricket Match Outcome Predictor

Tech Stack: Python, XGBoost, Pandas, NumPy, Scikit-learn, Streamlit

- Built an ML pipeline to predict T20 cricket match outcomes from historical match and player data.
- Engineered predictive features and tuned an XGBoost classifier to improve accuracy over baseline models.
- Shipped a Streamlit web app for real-time prediction and interactive visualization.

ACHIEVEMENTS & CO-CURRICULAR ACTIVITIES

- Academic Excellence Award, Ek Soch NGO.
- All Gujarat Rank 5, SSC (Class 10) Board Examination.
- Executive Member — Google Developer Groups on Campus (GDGC), SVNIT.
- Representative — Nexus (Technical Club), SVNIT.
